Solving the Hardest Challenges in DevOps

Perforce acquires 21 Labs

an AI-Based Scriptless Mobile Testing Provider

- Completely **SaaS** – speeding time to use, easing maintenance, and making 21 Labs the ideal technology to pair with Perfecto.
- Driven by AI and visual analysis – **21 learns your application**. This allows pre-building new tests as well as self-healing/self-adjusting existing tests that automatically update as interfaces and devices change
- **Framework agnostic** – 21 Labs allows clients to create tests no matter which framework was used to develop the mobile app under test.
